

JACKET MASTER series
NT-95C

Professional press to produce an ideal and beautiful silhouette

Features

- As the cuff holding positions are freely adjustable, it is possible to finish the sleeve line in accordance with your pattern.
- Adjustable from 320mm to 470mm, according to the shoulder breadth.
- Changing the attachments can change the breast-size.
- Combination steam and hot-air blow from solid type dummy enables a precise finishing without too much expansion of garment.
- With the computer control, you can set the most suitable conditions for the fabrics.
- You can change the program just by touching the display.
- By the hot air blowing, it is possible to stretch wrinkles and creases on the lining cloth.

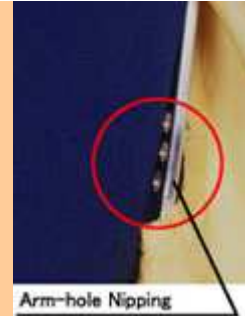

Voltage	220V 1-ph 50/60Hz
Electric Capacity	1kW
Air Pressure	0.4-0.5 MPa
Air Consumption	20-25 kg/h
Steam Pressure	0.4-0.5 MPa
